The surfaces in rooms throughout the home can be susceptible to the spread of COVID-19. You can help prevent the spread in your home by following CDC guidelines for infection prevention protocol and disinfecting hard, nonporous surfaces using an EPA-registered disinfectant.

### Common Spaces (LIVING ROOM, FOYER, HALLWAYS, DINING ROOM)

- **Disinfect commonly touched surfaces in the living area, including**:
  - Reusable bags brought out of the house should be washed upon entering.
  - Door handles, doorknobs, light switches, and drawer pulls.
  - Put dishwasher rinse cycle at the highest temperature to kill the most germs.
  - Wash dishes and utensils with gloves and hot water after each use.

- **Disinfect commonly shared surfaces against COVID-19**:
  - Countertops & cabinet handles
  - Refrigerator doors
  - Dishwasher
  - Toilets
  - Bathrooms

- **Disinfect daily door handles, doorknobs, key entry pads and other shared surfaces, especially after receiving deliveries or returning home.**

- **Common Spaces (BEDROOM, BATHROOM, LAUNDRY ROOM)**

  - **Bedroom**
    - Disinfect commonly touched surfaces in the bedroom with a disinfecting bleach solution:
    - Closet door handles & doorknobs
    - Bedside table & drawer pulls
    - Put dishwasher rinse cycle at the highest temperature to kill the most germs.
  - **Bathroom**
    - **Disinfect** commonly touched surfaces in the bathroom with a disinfecting bleach solution:
      - Door handles & doorknobs
      - Bedside table & drawer pulls
  - **Laundry Room**
    - **Disinfect** commonly touched surfaces in the laundry room with a disinfecting bleach solution:
      - Closet door handles & doorknobs

- **How to Help Prevent the Spread of COVID-19 in the Home**

  1. **Disinfect anything you handle frequently**:
     - Recycling or trash bins
     - Remote control
     - Toys
     - Pet toys & leashes
     - Hairdryer
  2. **If sharing a bathroom, wear disposable gloves and disinfect surfaces after every use.**
  3. To disinfect the toilet bowl: Flush the toilet, then add 1/3 cup bleach to the water in the bowl. Scrub with a toilet brush. Let the bowl sit for 5 minutes before flushing again.
  4. To disinfect the shower or bathtub, start by removing bathmats and other items. Wipe the tub/shower with the bleach solution. Let it sit for 6 minutes and then rinse with warm water.

- **Always follow the product label’s instructions for proper usage or dosing instructions. For a full list of products EPA approved for disinfecting against COVID-19 visit the CDC website. For the latest news about how to prevent the spread of COVID-19 and what Clorox products you can use to disinfect visit Clorox.com.”
